PROGRAMME

SESSION 1

09:00-10:00   Quality beyond technique

- Optimizing bowel preparation in our endoscopy units
- Sedation in colonoscopy: quality and safety
- Patient experience – the forgotten performance measure

SESSION 2

10:00-10:30   A national endoscopy registry – the NED project example

10:30-11:00   Coffee-break

SESSION 3

11:00-12:00   Identification of colorectal pathology

- Strategies to improve adenoma detection rates – the scientific evidence in 2020 and how to apply it
- Defining new target standards for adenoma and polyp detection rates
- Quality in IBD endoscopy – defining quality performance measures

SESSION 4

12:00-13:00   Advanced imaging in colonoscopy

- Advanced imaging for characterization of colorectal polyps – the "resect & discard" and "diagnose & leave" strategies
- Advanced imaging for characterization of early colorectal cancer – defining new frontiers between endoscopic and surgical resection
- Advanced imaging in IBD

13:00-14:30   Lunch break

PROGRAMME

SESSION 5

14:30-15:00   Artificial intelligence for colorectal polyp detection

SESSION 6

15:00-16:00   Management of pathology and complications

- Appropriate polypectomy technique
- Cold EMR
- How to manage colonic perforations

16:00-16:30   Coffee break

SESSION 7

16:30-17:30   Implementing and auditing quality

- Quality of colonoscopy across Europe
- How to implement a national quality programme
- How to audit and improve quality in our endoscopy units

SESSION 8

17:30-18:00   Quizz
